SAHAYAK

A PROTOTYPE FOR PUBLIC PROBLEM REPORTING AND RESOLUTION SYSTEM

UNDERSTANDING THE TOPIC

- SAHAYAK is a digital prototype designed to help citizens report public and social problems.
- It creates a direct communication channel between citizens and government authorities.
- The system focuses on transparency, accountability, and faster governance.

BACKGROUND

- In many areas, public problems remain unresolved due to poor communication.
- Citizens do not have a single trusted platform to report issues.
- Lack of monitoring and accountability causes delays.

PROBLEM DEFINITION

- Public issues such as road damage, pollution, sanitation, and local crime are often ignored.
- Complaints are delayed due to middlemen and unclear authority responsibility.
- There is no fixed time for approval or priority handling of problems.

KEY ISSUES IDENTIFIED

NO TRANSPARENCY

No transparency in how public problems are handled once reported.

NO PRIORITY SYSTEM

No priority-based system to distinguish urgent issues from minor ones.

DELAYED APPROVAL

Delayed approval of complaints due to unclear responsibility.

STATUS UNAWARENESS

Citizens remain unaware of the current status of their problem.

NEED OF SAHAYAK

- To provide a single digital platform for public problem reporting.
- To ensure approval of problems within 48 hours.
- To prioritize problems based on public support.
- To improve trust between citizens and government.

OBJECTIVES OF SAHAYAK

- Provide a direct platform for citizens to report public problems.
- Ensure problem approval within 48 hours.
- Prioritize problems based on severity and public support.
- Increase transparency and accountability in governance.
- Enable community participation in problem resolution.

KEY FEATURES

PUBLIC ISSUE REPORTING

Report roads, pollution, local crime, and sanitation issues.

COMMUNITY VISIBILITY

Reshare and upvote system to boost community-backed problems.

PRIORITY MANAGEMENT

Problems classified as high, medium, or low priority.

TIME-BOUND APPROVAL

Every problem is reviewed and approved within 48 hours.

ESCALATION SYSTEM

Delayed issues are automatically escalated for action.

AUTHORITY ASSIGNMENT

Direct assignment to municipal, police, or local leaders.

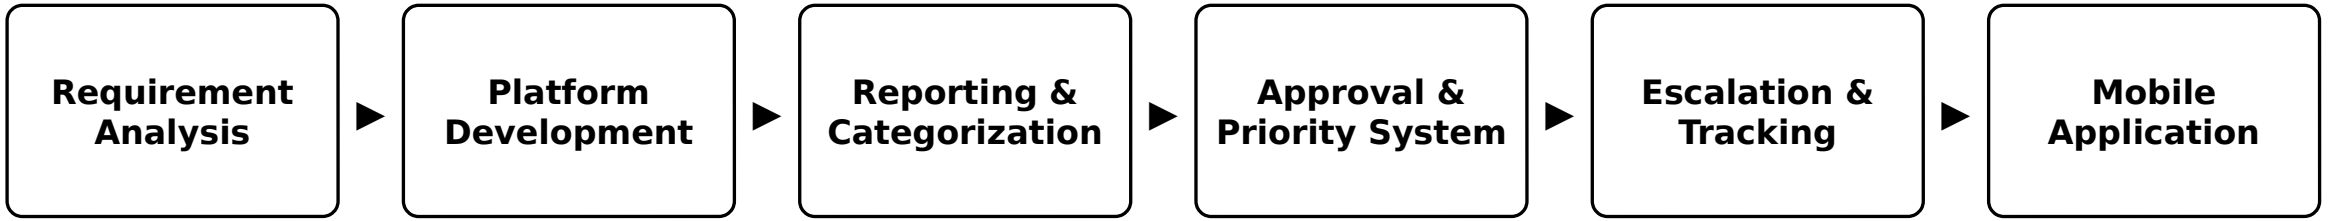

WORKING OF SAHAYAK PROTOTYPE

- Citizen submits a problem with description, image, and location.
- Problem enters 'Pending Approval' state (max 48 hours).
- Authority approves and assigns priority based on severity and community support.
- Approved problem receives status updates visible to the public.
- High-priority issues are resolved first; delays are escalated.
- Community can reshare/upvote problems to increase priority.

BENEFITS OF SAHAYAK

- Faster acknowledgment and resolution of public problems.
- Transparency in problem reporting and handling.
- Accountability of government authorities.
- Community participation in prioritizing issues.
- Trust between citizens and government improves.

ROADMAP

Requirement Analysis
Platform Development
Reporting & Categorization
Approval & Priority System
Escalation & Tracking
Mobile Application

DEVELOPMENT ROADMAP

PHASE 1
REQUIREMENT ANALYSIS

▼

Identify citizen and authority requirements, problem categories, platform workflow, and essential features.

PHASE 2
CORE PLATFORM

▼

Develop citizen registration, authority login, problem submission with image and location, and status dashboard.

PHASE 3
SMART CATEGORIZATION

▼

Introduce category-based routing and severity tagging to direct problems to the right authority.

PHASE 4
APPROVAL & ESCALATION

▼

Introduce the 48-hour approval workflow, community upvote-based prioritization, and automatic escalation of delays.

PHASE 5
TRANSPARENCY & TRACKING

▼

Integrate public status tracking, notifications, and performance dashboards for authorities.

PHASE 6
MOBILE APPLICATIONS

▼

Develop dedicated Android and iOS applications for convenient citizen access and voice reporting.

FUTURE SCOPE

- AI-based automatic complaint categorization.
- Regional language support and voice reporting.
- Integration with official government portals.
- Performance dashboards for authorities.
- Penalty system for repeated delays.

CONCLUSION

- SAHAYAK acts as a digital bridge between citizens and authorities.
- Ensures 48-hour problem approval and priority-based resolution.
- Promotes transparency, accountability, and community involvement.
- A scalable solution for faster and smarter governance.

THANK YOU
